ELBURG YACHTING®

international yachtbrokers

This is a unique boat that is rarely found on the market.

Although it is solidly and reliably built, has practical dimensions in every respect, is equipped with useful technology and designed by the renowned yacht architect Vripak, the owner, who is now selling his 'dream ship', has been able to further enhance this vessel with his more than 50 years of experience in boating. These are not just things that are visible at first glance, such as the redesign of the forward cabin from two bunk beds to a central double bed with huge storage spaces (the only Stentor model with this interior layout), the installation of an active AIS system, remote controls for the engine, thrusters and autopilot. No less interesting are the things that are not visible at first glance, but which the new owner will appreciate when he discovers them. Examples are the rainproof (removable) ventilation inserts in many windows, which provide a continuous supply of fresh air and prevent bad odours or mould, or the fresh water filters* installed for the water in the bow and stern sinks to prevent infection from germs when the water is used for brushing teeth, for example (installed with valves on the side so that the filter insert can be replaced without hindering the use of fresh water elsewhere). Be curious.
